OMALE OMALE FAVOUR

FULL STACK DEVELOPER

omaleomale310@gmail.com | 09025987954 | LinkedIn: linkedin.com/in/omale-omale-713312346 | GitHub: github.com/Omaledev

PROFESSIONAL SUMMARY

Full Stack Developer experienced in designing, building, and maintaining web applications and REST APIs using Laravel, PHP, MySQL, JavaScript, and modern frontend tools. Contributes across the software delivery lifecycle—from database design and responsive interfaces to payment integrations, deployment, and ongoing improvements. Has worked on solutions across transport, corporate communications, construction and real estate, education, crowdfunding, and wellness. Also experienced in mentoring and training aspiring developers, having supported more than 90 students and interns. Focused on maintainable code, practical problem-solving, reliable user experiences, and continuous learning.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, TypeScript, React, Bootstrap, Tailwind CSS

Backend: PHP, Laravel, Livewire, Object-Oriented Programming (OOP), REST APIs

Databases: MySQL, relational database design

Integrations & Delivery: Paystack, Monnify, webhooks, application deployment, CI/CD pipelines

Tools & Collaboration: Git, GitHub, code review, Agile collaboration, technical mentoring, problem-solving

PROFESSIONAL EXPERIENCE

Gnorizon Consults | Full Stack Developer

Jan 2025 - Present

- Develop and maintain APIs for transportR, supporting transport services and platforms including Plateau Riders, Tincitymetro Bus, Valgee Transport, and Swiftlane.
- Build and deploy Hamaz, a corporate communications platform, using Laravel and Bootstrap.
- Collaborate with the engineering team to design and implement backend features and database-driven solutions with Laravel and MySQL.
- Integrate Paystack and Monnify payment services using webhooks to support transaction workflows.
- Contribute to automated testing and deployment workflows through CI/CD practices.

Axiahub Technology and Innovation Hub | Full Stack Developer & Instructor

Jan 2025 - Present

- Contribute to client and internal technology projects using Laravel, React, MySQL, and modern CSS frameworks.
- Develop responsive interfaces with Tailwind CSS and Bootstrap and support end-to-end implementation of web solutions.
- Train and mentor more than 90 students and interns in full-stack development.
- Participate in team collaboration, code reviews, knowledge sharing, and iterative software development.

SELECTED PROJECTS

1. **TransportR — API Developer** | transportr.africa
   Built and maintained APIs supporting transport and booking platforms for multiple transport operators.
2. **Hamaz — Full Stack Developer** | hamazcomms.com
   Developed a corporate communications website using Laravel and Tailwind CSS, including responsive layouts and content-management features.
3. **BuildXora — Founder & Developer** | buildxora.com
   Building a construction and property-focused technology platform intended to connect clients, professionals, artisans, suppliers, and agents.
4. **Edu360SMS — Founder & Developer** | edu360sms.com
   Developing a school management and SMS notification platform to support school administration and communication.
5. **Crowdlink — Developer** | crowdlink.com
   Worked on a crowdfunding platform with user-management and payment-integration features.
6. **Light Vital Wellness — Developer** | lightvitalwellness.com
   Developed a wellness e-commerce website with product catalog and checkout functionality.

EDUCATION

B.Sc. in Building
University of Jos, Nigeria | 2017–2024
